

## Effective Pest Prevention

# Sharps Clearance Services

Whelan Pest Prevention is a Southampton based company  
That has built it's reputation on excellence

The company was founded over 15 years ago and has  
grown to become the regions best-known and most  
trusted provider of pest Prevention services.

We have successfully developed a range of techniques and  
products to protect your health, food and property in the most effective and environmentally  
responsible way possible.

The Whelan Pest Prevention pledge is to provide the finest supervised service, giving our  
customers, and their customers and staff, safe, effective protection for their working  
environment and their reputation.

### Garden & House Clearance Services

Whelan Pest Prevention provide a sharps removal and disposal service for needle sticks  
and syringes from illegal drug users. Sharps waste is often encountered on waste ground  
in bins, toilets and public areas such as parks, closes and in properties used as shooting  
galleries.

These areas all present a very real health hazard. Blood borne pathogens such as HIV  
and Hepatitis are highly infectious and contact with them can have very serious and  
sometimes life threatening consequences. These are often carried by drug users and  
addicts who carelessly discard their needles as soon as they have injected.

**Whelan Pest Prevention offer the following services:**

**carrying out needle sweeps on land and properties known and suspected  
removing needles and sharps waste safely  
disinfecting and fumigating affected areas  
disposing of needles and sharps**

Whelan Pest prevention have fully trained staff to carry out these procedures and has  
done for a variety of organisations including Network Rail, local Council authorities,  
housing associations, land and property owners as well as many others.

**We are members and accredited to the following :**

## Effective Pest Prevention

At Whelan Pest Prevention we believe that there is no such thing as the 'standard' or 'typical' client. Consequently we think that there should be no such thing as the 'standard' approach to managing Pest Prevention issues.

We work closely with each of our clients to ensure we have made a thorough evaluation of their requirements and have responded with the best possible solution for now and for the future.

### IDENTIFYING THE RIGHT PARTNER

It can be difficult identifying what you should be looking for in a Pest Prevention partner. We believe that the following are essential and we offer all of these as standard:

- Fully trained and qualified surveyors and technicians
- Demonstration of recognised Health & Safety procedures
- Appropriate Public Liability Insurance in place
- Detailed, clear and concise reporting & recommendations

### KEY OBJECTIVES

Our key objectives for all of our clients are to:

- Safeguard the reputation of your business
- Strengthen staff relations
- Face legal responsibilities with confidence
- Eliminate the threat of pest related illnesses
- Conduct full Photographic Surveys
- Work in conjunction with Health and Safety legislation
- Provide full access to Audit Trail of All waste Transfer
- Conduct Full on Site risk Assessments
- Provide full Method Statements
- Act in a discreet but very effective manner

Understanding your needs

## Effective Pest Prevention

Customers that have used Whelan Pest Prevention Clearance services

*"I have 42 years as an experience as a Contract Cleaner and I have never seen a house in such a filthy and cluttered condition as this 3 bedroomed semi. The 6 men worked diligently for two full days amidst very distasteful conditions, but were good humoured and cooperative in efforts to preserve the few items of value amidst the filth. They found and handed in various unfound small valuables, and I would regard them as trustworthy in that respect. I feel they were good value as a service combined cleaning and disposal which would otherwise be difficult to obtain."*

*Mr Hawkins Southampton*

*"Following the death of a tenant in my rented property we were confronted with the clearance of the house which was in a state of squalor! The rooms were elevated by 2-3 foot of rubbish, rotting food etc. We contacted the Whelan Pest Prevention Team who were extremely helpful & supportive, they arrived on time and despite the dreadful conditions worked tirelessly to get the job done. They did what they promised and cleared the whole house. The team was fantastic and did not complain in any way - great guys who we got on with very well and we cannot thank them enough, and would recommend them to anyone facing the kind of problems we were confronted with."*

*Mr & Mrs T Chandlers ford*
